

# Mikto-Arm Star Polymers For Delivery of Therapeutic Agents

## Categories

Wellness, Medical and Healthcare

## Solution

Our innovation increases the effectiveness of the delivery of hydrophobic drugs and nutraceuticals.

## Technology & Applications

This invention is related to mikto-arm star polymers for delivery of therapeutic agents, and more specifically to the delivery of hydrophobic drugs and nutraceuticals used in the treatment of a medical condition and/or as dietary supplements.

## Advantages

Basically, the use of mikto-arm star polymer indicate several performance including;

- Improved loading capacity of hydrophobic cargoes which increase the efficiency of drug delivery.

- Increase water solubility.
- Preferably biodegradable and/or biocompatible

## Intellectual Property

PI2018703436
